

A story about having the nasal (nose) flu spray in school

Sometimes I need to have
the nasal spray, it can stop
me from getting poorly

School staff will bring me to see
a nurse

The nurse will be waiting in
a room

The nurse will ask me some questions like my name and birthday

The nurse will give me the
nasal spray in each nostril

This may feel a bit funny and
tickle my nose

The nurse will give me a tissue
to wipe my nose

The school staff member will
take me back to my class
