North Cumbria

Neonatal Regional Position

Sam Allen, Chief Executive

David Purdue, Executive Chief Nurse

MBRRACE data 2021

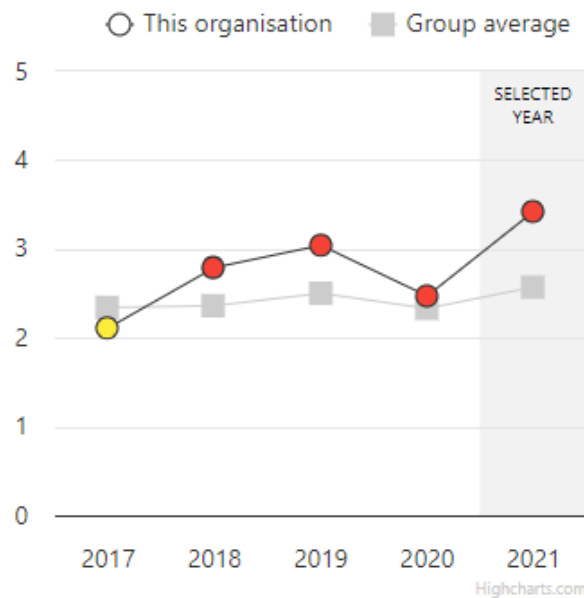

The Newcastle upon Tyne Hospitals NHS Foundation Trust

Comparator group: Level 3 NICU & neonatal surgery Country: England Neonatal network: Northern

Region: North East and Yorkshire

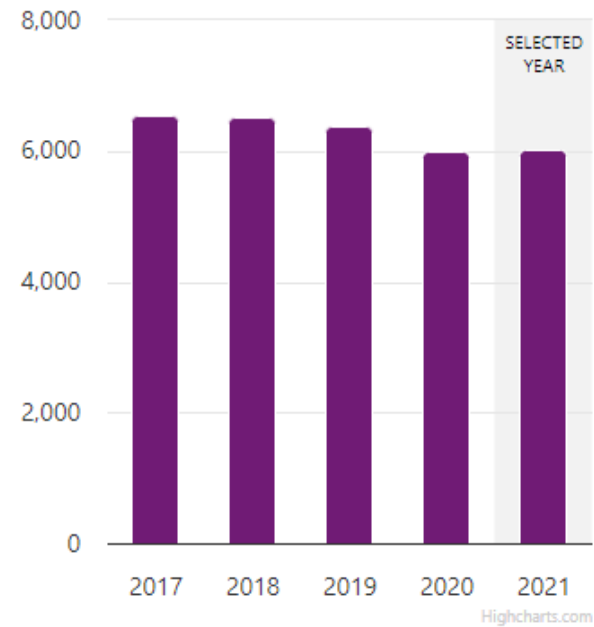

Mortality rates, by year

Stabilised & adjusted rate per 1,000 live births of the total number of neonatal deaths

Births, by year

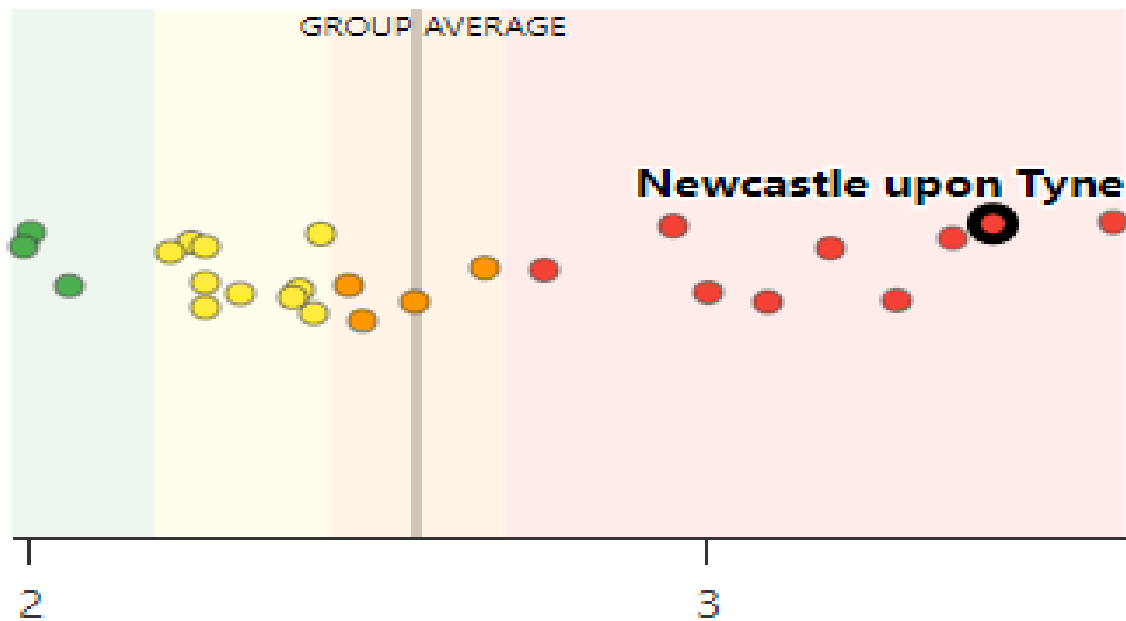

Total number of births

MBRRACE data 2021

Mortality rates, Level 3 NICU & neonatal surgery, 2021

Stabilised & adjusted rate per 1,000 live births of the total number of neonatal deaths

How we evaluate the data

- Perinatal Quality Surveillance model now operational and embedded.
 - Perinatal Mortality Review Tool (PMRT) quarterly reports included in returns. All Healthcare Safety Investigation Branch and Serious Incident reports shared with Local Maternity and Neonatal System (LMNS) and reviewed and themed.
 - Clinical Negligence Scheme for Trust documents submitted to confirm compliance with safety action 1 (PMRT) and Safety Action 10 (NHS Resolution) and Safety Action 9 (safety champion)
 - HSIB, NHR and Child Death Overview Panel (CDOP) leads for North attend quality and safety LMNS meeting to present north data and identify trends.
 - Standardised Dashboard developed with Maternity Services Data Set and MBRRACE data for ICB providers
 - Peer review Ockenden assurance visits – comprehensive agenda, including focus on Freedom to Speak Up, culture and staff experience.
 - Perinatal leadership culture programmes underway.
- The ICB working with specialized commissioning will undertake a multi-professional assurance visit to the Trust.
