

**Your support
can make all
the difference
this winter**

A trusted conversation

Help residents understand why vaccines are important, answer their questions and offer reassurance.

Easy for residents

There's no need to book. NHS vaccination teams will visit care homes to offer eligible residents their vaccines.

Protect yourself to protect others

Care home staff can get a free NHS flu vaccine through their employer or at a community pharmacy.

Every conversation counts

By supporting residents and getting vaccinated yourself, you're helping protect the people you care for and your whole care home community this winter.

Be Wise. Immunise.
