

Help protect someone you love this winter

A conversation today can help protect your loved one this winter

A little encouragement goes a long way

Hearing from someone they trust can help your loved one feel confident about getting vaccinated.

Nothing to organise

NHS vaccination teams will visit care homes, making it quick and convenient.

Who can have the vaccines?

Older adult care home residents are eligible for free NHS flu and COVID-19 vaccines this autumn.

Safe, effective and well tested

Most people only have a sore arm or feel a little tired for a day or two afterwards.

Be Wise. Immunise.
